

WEEKLY REPORT and MEETING AGENDA

Report #: 6 Project Name: Pocket Pantry
Date: 11/11/2024 Prepared by: Brian Glasheen

Agenda for the meeting

1. Share project status
2. Feedback / advice
3. Wrap up and get to work

Overall accomplishments since last meeting

1. Backend nearing full functionality
2. Ironed out quirks in data processing; can scale and apply to many more recipes

Tasks completed by each team member since last meeting

Task description	Assigned to	Completed?
Page / component layout	Zack / Jacob	Yes
Complete recipes table with properly formatted data	Brian	Yes
Planned meals properly link with users and recipes	Brian	Yes
Inventory table queries	Connor	In progress
Create a dummy inventory for testing	Connor	Yes

Plans for next period

1. Complete matching algorithm for inventories and recipes
2. Add jwt/auth to prevent users from making POST requests they shouldn't be able to
3. Setup account creation from the user's POV
4. Finalize UI components and begin integration

Task assignment per team member (to be completed before the next meeting)

Task description	Assigned to
Finish matching algorithm for use against user's inventories (planning & recommending)	Brian
Iron out fuzzy matching with ingredients, for previous task above	Brian
Auth token (jwt) for POST requests	Brian
User creation with authentication	Brian
Implement functionality & final UI/design touches	Zack / Jacob
Figure out how to upload to Android Store	Nick
Iron out inventory interaction when planned meal is marked as cooked & shopping list items are marked as bought	Connor

Project management status

Progress is ramping up. Still lots to be done, but goals are realistic.

Minutes from previous meeting

Some feature drops for the goal of getting the core of the app into a better state is not the worst idea.

Overall, we just need to put our heads down and really get productive.

(I know it says don't use short, bulleted lists, but our meeting from last weekend seems like an exception.)
